

Department of Chemistry Online Course Syllabus

CHM 434H/CHM 1206H: Advanced Materials Chemistry, Fall 2020

I CONTACTS

INSTRUCTOR

Geoffrey Ozin

Email: g.ozin@utoronto.ca

Office: Room 326

Online student hours: Tuesday 4-6 pm

Geoffrey A. Ozin is a Distinguished University Professor and Government of Canada Research Chair in Materials Chemistry and Nanochemistry. He currently spearheads the Solar Fuels Team www.solarfuels.utoronto.ca at the University of Toronto St. George Campus. He has held positions as Honorary Professor at The Royal Institution of Great Britain and University College London, External Adviser for the London Centre for Nanotechnology, Alexander von Humboldt Senior Scientist at the Max Planck Institute for Surface and Colloid Science and the Center for Functional Nanostructures at the Karlsruhe Institute of Technology, and Global Chair at Bath University. He is the author of three books: Nanochemistry: A Chemical Approach to Nanomaterials (2006), Concepts of Nanochemistry (2009) and The Story of CO₂: Big Ideas for a Small Molecule.

TEACHING ASSISTANT

Jon Babi

Email: jon.babi@mail.utoronto.ca

Online student hours: Tuesday 4-6 pm

Jon Babi is a first-year graduate student in Professor Helen Tran's lab, studying self-assembling polymers for use in soft electronics. He enjoys riding his bike around the city, preparing various pasta dishes, and watching movies. His favourite polymer is polyaniline and his favourite film is Mike Mills' Beginners.

II COURSE OVERVIEW

COURSE DESCRIPTION:

This course is designed as a follow-up to CHM 238Y (Introduction to Inorganic Chemistry) with classes on solid state chemistry basics and CHM 325H (Polymer and Materials Chemistry), with classes on synthesis-structure-property-function relations of selected classes of low dimensional polymeric and inorganic materials.

In CHM 434H/CHM 1206H we will be concerned with a comprehensive investigation of a wide range of synthetic methods for preparing diverse classes of inorganic materials and nanomaterials with properties and function that are intentionally tailored for a particular use. A number of contemporary issues in materials research are critically evaluated to introduce the student to recent highlights in the field of materials chemistry and nanochemistry – now a well-established sub-discipline of chemistry.

STUDENT LEARNING OUTCOMES: The aim of this course is to provide a cohesive introduction into the materials world and “materials thinking.” We will begin with a primer on solid-state materials and connections between structure, bonding and molecular orbitals in molecule chemistry, and crystal lattices, cohesive energy, and electronic bands in solid-state materials chemistry. Following that, a survey of archetypical inorganic solids that have had a dramatic influence on the materials world, along with an overview of strategies for synthesizing and understanding the formation of many different classes of materials and nanomaterials with intentionally designed compositions and structures, dopants, defects and non-stoichiometry, textures and morphologies over multiple length scales and dimensionalities, with an emphasis how to control the relations between structure, property, function and utility.

PREREQUISITE COURSES:

This course assumes you have a basic understanding of inorganic chemistry, including topics covered by the prerequisites for the course (CHM 238Y and CHM 325H).

REQUIRED TEXT:

L. Smart and E. Moore, Solid State Chemistry, An Introduction, Chapman and Hall, London, Fifth Edition.

III HOW THE COURSE IS ORGANIZED

This course involves 2-hour weekly classes, scheduled Thursday 4-6 pm throughout the fall semester. In a fully online course, there is no in-person scheduled classroom time. Over the course of each week throughout the term, you are expected to attend the classes, read the PowerPoint class notes and relevant parts of the required text, supplement this reading with useful material in the recommended texts, participate in oral presentations and submit assignments according to the due dates.

COURSE SCHEDULE & RELEVANT SESSIONAL DATES:

DATES	TOPICS
September 8 th	Pre-Class Meet n' Greet
September 10 th	Class 1
September 17 th	Class 2 (Assignment 1 due)
September 24 th	Class 3 (Assignment 2 due)
October 1 st	Class 4
October 8 th	Class 5 (Assignment 3 due)
October 15 th	Class 6
October 22 nd	Class 7
October 29 th	Class 8 (Assignment 4 due)
November 5 th	Class 9
November 9-13 th	Reading Week! (No Class)
November 19 th	Class 10 (Assignment 5 due)
November 26 th	Class 11 (Assignment 6 due)
December 11-22 nd	Final Assessment Period (Final Assessment)

IV EVALUATION/GRADING SCHEME

Assignment 1 – Due September 17 th Structure, Bonding, Properties in Materials	5%
Assignment 2 – Due September 24 th Materials that Changed the World	10%
Assignment 3 – Due October 8 th Materials Chemistry Topics Presentation	13%
Assignment 4 – Due October 29 th Materials Innovation Research Project Presentation	12%
Assignment 5 – Due November 19 th Materials Art-Science Presentation	5%
Assignment 6 – Due November 26 th Materials Term Paper	25 or 30%*
Final Assessment – December Final Assessment Period	25 or 30%*

*The assignment with the highest grade will be given the larger weight.

Note: if an unexpected technical issue occurs with a university system (e.g., Quercus services, network outage) that affects availability or functionality, it may be necessary to revise the timing or weighting of the assessments.

V COURSE POLICIES

- Students are highly encouraged to attend a pre-class "**Meet n' Greet**" scheduled for **September 8th, 4 - 6 PM, on BB Collaborate**. We will go over course etiquette and expectations.
- **Getting in touch:** please contact the course instructor and teaching assistant with any questions about the course by email, Geoffrey Ozin: g.ozin@utoronto.ca and Jon Babi: jon.babi@mail.utoronto.ca.
- The University of Toronto is committed to equity, human rights, and respect for diversity. All members of the learning environment in this course should strive to create an atmosphere of mutual respect where all members of our community can express themselves, engage with each other, and respect one another's differences. **We have the highest expectations from you all to act in a respectful manner towards your peers and colleagues.**
- This course, including your participation, will be recorded on video and will be available to students in the course for viewing remotely and after each session. Course videos and materials belong to your instructor, the University, and/or other sources depending on the specific facts of each situation and are protected by copyright. **Do not download, copy, or share any course or student materials or videos without the explicit permission of the instructor.** For questions about recording and use of videos in which you appear please contact your instructor.
- Submission for all assignments will take place on Quercus, with a penalty of 10% deducted for each day late.
- Students are responsible for informing the instructor and TA about any expected absences. In case of emergency it is vital to notify us as soon as possible so accommodations can be made.

VI TECHNOLOGY REQUIREMENTS

Specific guidance from the U of T Vice-Provost, Students regarding student technology requirements is available here: <https://www.vicereprovoststudents.utoronto.ca/covid-19/tech-requirements-online-learning/>

This course requires the use of computers, and of course sometimes things can go wrong when using them. You are responsible for ensuring that you maintain regular backup copies of your files, use antivirus software (if using your own computer), and schedule enough time when completing an assignment to allow for delays due to technical difficulties. Computer viruses, damaged hard drives, lost or corrupted files, incompatible

file formats, and similar mishaps are common issues when using technology, and are not acceptable grounds for a deadline extension.

VII INSTITUTIONAL POLICIES AND SUPPORT

ACADEMIC INTEGRITY

On Academic Integrity:

Academic integrity is essential to the pursuit of learning and scholarship in a university, and to ensuring that a degree from the University of Toronto is a strong signal of each student's individual academic achievement. As a result, the University treats cases of cheating and plagiarism very seriously. The University of Toronto's Code of Behaviour on Academic Matters (<https://governingcouncil.utoronto.ca/secretariat/policies/code-behaviour-academic-matters-july-1-2019>) outlines the behaviours that constitute academic dishonesty and the processes for addressing academic offences. Potential offences include, but are not limited to:

In papers and assignments:

1. Using someone else's ideas or words without appropriate acknowledgement.
2. Submitting your own work in more than one course without the permission of the instructor.
3. Making up sources or facts.
4. Obtaining or providing unauthorized assistance on any assignment.

On tests and exams:

1. Using or possessing unauthorized aids.
2. Looking at someone else's answers during an exam or test.
3. Misrepresenting your identity.

In academic work:

1. Falsifying institutional documents or grades.
2. Falsifying or altering any documentation required by the University.

All suspected cases of academic dishonesty will be investigated following procedures outlined in the Code of Behaviour on Academic Matters. If you have questions or concerns about what constitutes appropriate academic behaviour or appropriate research and citation methods, you are expected to seek out additional information on academic integrity from your instructor or from other institutional resources (see <https://www.academicintegrity.utoronto.ca/>).

Use of Turnitin

Students will be required to submit their work to Quercus, which makes use of Turnitin.com for a review of textual similarity and detection of possible plagiarism. In

doing so, students will allow their essays to be included as source documents in the Turnitin.com reference database, where they will be used solely for the purpose of detecting plagiarism. The terms that apply to the University's use of the Turnitin.com service are described on the Turnitin.com web site.

ACCESSIBILITY NEEDS

Students with diverse learning styles and needs are welcome in this course. The University of Toronto is committed to accessibility: if you require accommodations for a disability, or have any other accessibility concerns about the course, please contact [Accessibility Services](#) as soon as possible.

ADDITIONAL SERVICES and SUPPORT

The following are some important links to help you with academic and/or technical service and support

- General student services and resources at [Student Life](#)
- Full library service through [University of Toronto Libraries](#)
- Resources on conducting online research through [University Libraries Research](#)
- Resources on academic support from the [Academic Success Centre](#)
- Learner support at the [Writing Centre](#)
- Information for [Technical Support/Quercus Support](#)
