Department of Chemistry Online Course Syllabus

CHM 455-1206H: Advanced Materials Chemistry, Fall 2022

I CONTACTS

INSTRUCTOR

Geoffrey Ozin
Email: g.ozin@utoronto.ca
Website: www.solarfuels.utoronto.ca
Website: www.nanowizard.info
Office: Room 326
Online student office hours: Tuesday 4-6 pm

BIOGRAPHICAL

Geoffrey A. Ozin is a distinguished University Professor at the University of Toronto. He currently spearheads the Solar Fuels Team at the University of Toronto, www.solarfuels.utoronto.ca. He has held positions as Honorary Professor at The Royal Institution of Great Britain and University College London, External Adviser for the London Centre for Nanotechnology, Alexander von Humboldt Senior Scientist at the Max Planck Institute for Surface and Colloid Science and the Center for Functional Nanostructures at the Karlsruhe Institute of Technology, Global Chair at Bath University, and Leverhulme Professor at Imperial College London. He is the author of five books: Cryochemistry (1976), Nanochemistry: A Chemical Approach to Nanomaterials (2006), Concepts of Nanochemistry (2009), The Story of CO2: Big Ideas for a Small Molecule (2020), and Energy Materials Discovery Enables a Sustainable Future (2022). Co-founder of several Canadian spinoff companies Torrovap, Opalux, Solistra, and Co2Rail, and recipient of numerous prestigious awards most recently the Killam Prize in Natural Science, World Cultural Council Albert Einstein Award in Science, Royal Society of Chemistry Centenary Prize in Nanochemistry, and World Technology Award in Energy. He lives with his wife in Toronto, Canada.
II COURSE OVERVIEW

COURSE DESCRIPTION:

This online cross-listed undergraduate-graduate course is designed as a follow-up to CHM 255Y (Introduction to Inorganic Chemistry) with lectures on solid state chemistry basics and CHM 355H (Polymer and Materials Chemistry), with lectures on synthesis-structure-property-function relations of selected classes of low dimensional polymeric and inorganic materials.

In CHM 455H/CHM 1206H we will be concerned with a comprehensive investigation of a wide range of synthetic methods for preparing diverse classes of inorganic materials and nanomaterials with properties and function that are intentionally tailored for a particular use. Several contemporary issues in materials research are critically evaluated to introduce the student to recent highlights in the field of materials chemistry and nanochemistry – now a well-established sub-discipline of chemistry.

STUDENT LEARNING OUTCOMES:

1. The aim of this course is to provide a cohesive introduction into the materials world and "how materials chemists think." We will begin with a primer on solid-state materials and connections between structure, bonding and molecular orbitals in molecule chemistry, and crystal lattices, cohesive energy, and electronic bands in solid-state materials chemistry. Following that, a survey of archetypical inorganic solids that have had a dramatic influence on the materials world, along with an overview of strategies for synthesizing and understanding the formation of many different classes of materials and nanomaterials with intentionally designed compositions and structures, dopants, defects and non-stoichiometry, textures and morphologies over multiple length scales and dimensionalities, with an emphasis on how to control the relations between structure, property, function and utility, in a wide range of technologies.

2. Practice science with integrity and sensitivity to ethical, environmental, and social concerns, by committing to promoting diversity, equitable behaviour, academic rigour, and responsible leadership.

3. Gain knowledge through new ideas and hypothesis-driven methods of inquiry aimed at answering scientific questions through the design and implementation of experimental and theoretical methods used in the field of solid-state materials chemistry.

4. Apply quantitative and qualitative methods used in the instrumental analysis, evaluation, and interpretation of scientific data in the field of solid-state chemistry.

5. Access, select and critically evaluate scientific information and literature to conceive and solve a wide range of problems both within and outside of the field of solid-state materials chemistry.

6. Consider limitations, assumptions, and uncertainties when imagining, making decisions, or solving scientific problems in the field of solid-state materials chemistry, and justify the approach(es) taken.
7. Communicate scientific knowledge in the field of solid-state materials chemistry to diverse audiences clearly and concisely in written, oral, and visual forms, both in-person and online.

8. Work independently and collaboratively while exercising initiative, responsibility, and accountability in both personal and group contexts.

9. Understand, practice, and promote safe behaviour in a laboratory environment, including responsible management of chemical resources.

10. Reflect upon the dynamic nature of solid-state materials chemistry and value opportunities for updating knowledge, understanding, and technical and professional skills as practitioners of the discipline on a continuing basis.

**PREREQUISITE COURSES:**

This course assumes you have a basic understanding of inorganic chemistry, including topics covered by the prerequisites for the course (CHM 238Y and CHM 325H).

**REQUIRED TEXT:**

**III  HOW THE COURSE IS ORGANIZED**

**COURSE PLAN:**

We will begin with a recommended meet n’ greet on-line, getting to know each other session, a look at the course content, mutual expectations, and learning outcomes.

This course involves 2-hour weekly classes, scheduled Thursday 4-6 pm throughout the fall semester with office style tutorials on Tuesdays 4-6 pm, to discuss, clarify, and solve any problems that may arise with the course material and assignments. As a **fully online zoom course**, there is no in-person scheduled classroom time. Over the course of each week throughout the term, you are expected to attend the online zoom classes, read the PowerPoint class notes and relevant parts of the required text, supplement this reading with useful material in the recommended texts, participate in tutorial and oral presentations and submit assignments according to the due dates.

### IV EVALUATION/GRADING SCHEME

Assignment 1 – Due September 15<sup>th</sup>
Structure, Bonding, Properties in Materials Written Presentation 5%

Assignment 2 – Due September 22<sup>nd</sup>
Materials that Changed the World Written Presentation 10%

Assignment 3 – Due October 6<sup>th</sup>
Materials Chemistry Topics Video Oral Slide Presentation 13%

Assignment 4 – Due October 27<sup>th</sup>
Materials Innovation Research Project Video Oral Slide Presentation 12%

Assignment 5 – Due November 17<sup>th</sup>
Materials Art-Science Video Oral Slide Presentation 5%

Assignment 6 – Due November 24<sup>th</sup>
Materials Project Written Presentation 25 or 30%*

Final Assessment – December Final Assessment Period 25 or 30%*

Total 100%

*The assignment with the highest grade will be given the larger weight.

Note: if an unexpected technical issue occurs with a university system (e.g., Quercus services, network outage) that affects availability or functionality, it may be necessary to revise the timing or weighting of the assessments.

### V COURSE POLICIES

- Students are highly encouraged to attend a pre-class "Meet n' Greet" scheduled for September 6<sup>th</sup>, 4 - 6 PM, on Zoom. We will go over course etiquette and expectations.
• **Getting in touch:** please contact the course instructor with any questions about the course by email, Geoffrey Ozin: g.ozin@utoronto.ca

• The University of Toronto is committed to equity, human rights, and respect for diversity. All members of the learning environment in this course should strive to create an atmosphere of mutual respect where all members of our community can express themselves, engage with each other, and respect one another’s differences. **We have the highest expectations from you all to act in a respectful manner towards your peers and colleagues.**

• This course, including your participation, will be recorded on video and will be available to students in the course for viewing remotely and after each session. Course videos and materials belong to your instructor, the University, and/or other sources depending on the specific facts of each situation and are protected by copyright. **Do not download, copy, or share any course or student materials or videos without the explicit permission of the instructor.** For questions about recording and use of videos in which you appear please contact your instructor.

• Submission for all assignments will take place on Quercus, with a penalty of 10% deducted for each day late.

• Students are responsible for informing the instructor and TA about any expected absences. In case of emergency it is vital to notify us as soon as possible so accommodations can be made.

**VI TECHNOLOGY REQUIREMENTS**

Specific guidance from the U of T Vice-Provost, Students regarding student technology requirements is available here: https://www.viceprovoststudents.utoronto.ca/covid-19/tech-requirements-online-learning/

This course requires the use of computers, and of course sometimes things can go wrong when using them. You are responsible for ensuring that you maintain regular backup copies of your files, use antivirus software (if using your own computer), and schedule enough time when completing an assignment to allow for delays due to technical difficulties. Computer viruses, damaged hard drives, lost or corrupted files, incompatible file formats, and similar mishaps are common issues when using technology, and are not acceptable grounds for a deadline extension.

**VII INSTITUTIONAL POLICIES AND SUPPORT**

**ACADEMIC INTEGRITY**

On Academic Integrity:

Academic integrity is essential to the pursuit of learning and scholarship in a university,
and to ensuring that a degree from the University of Toronto is a strong signal of each
student’s individual academic achievement. As a result, the University treats cases of
cheating and plagiarism very seriously. The University of Toronto’s Code of Behaviour on
Academic Matters (https://governingcouncil.utoronto.ca/secretariat/policies/code-
behaviour-academic-matters-july-1-2019) outlines the behaviours that constitute academic
dishonesty and the processes for addressing academic offences. Potential offences
include, but are not limited to:

In papers and assignments:
1. Using someone else’s ideas or words without appropriate acknowledgement.
2. Submitting your own work in more than one course without the permission of the
   instructor.
3. Making up sources or facts.
4. Obtaining or providing unauthorized assistance on any assignment.

On tests and exams:
1. Using or possessing unauthorized aids.
2. Looking at someone else’s answers during an exam or test.
3. Misrepresenting your identity.

In academic work:
1. Falsifying institutional documents or grades.
2. Falsifying or altering any documentation required by the University.

All suspected cases of academic dishonesty will be investigated following procedures
outlined in the Code of Behaviour on Academic Matters. If you have questions or concerns
about what constitutes appropriate academic behaviour or appropriate research and
citation methods, you are expected to seek out additional information on academic
integrity from your instructor or from other institutional resources (see
https://www.academicintegrity.utoronto.ca/).

Use of Turnitin
Students will be required to submit their work to Quercus, which makes use of Turnitin.com
for a review of textual similarity and detection of possible plagiarism. In doing so,
students will allow their essays to be included as source documents in the Turnitin.com
reference database, where they will be used solely for the purpose of detecting
plagiarism. The terms that apply to the University’s use of the Turnitin.com service are
described on the Turnitin.com web site.

ACCESSIBILITY NEEDS
Students with diverse learning styles and needs are welcome in this course. The University
of Toronto is committed to accessibility; if you require accommodations for a disability, or
have any other accessibility concerns about the course, please contact Accessibility
Services as soon as possible.

ADDITIONAL SERVICES and SUPPORT
The following are some important links to help you with academic and/or technical service
and support
- General student services and resources at Student Life
- Full library service through University of Toronto Libraries
- Resources on conducting online research through University Libraries Research
- Resources on academic support from the Academic Success Centre
- Learner support at the Writing Centre
- Information for Technical Support/Quercus Support
